## DIN Rail Utility Box

Wieland now offers a DIN Rail Utility Box in several different versions that offer a labor saving way to provide utility power to any control cabinet. Installing the DIN Rail Utility Box is as easy as snapping the box onto a 35mm DIN rail and connecting the Line, Neutral and Ground wires to the terminal block, utility power for fans, lights, laptop computers, testers or any other need is now at your disposal. The DIN Rail Utility Boxes come pre-wired with a variety of receptacles and we offer modules for applications where GFCI (ground fault) protection is required.

Our DIN Rail Utility Boxes may be mounted either vertically or horizontally on the DIN rail. The horizontal version comes with the terminal block mounted for easy wiring when the DIN Rail Utility Box is mounted horizontally.
